AOD-9604

SCIENTIFIC PRODUCT RESEARCH SUMMARY

Weight Management & Metabolic Health

5 mg | $70.00 CAD

WHAT IS IT?

A modified fragment of human growth hormone studied for metabolic and adipose-tissue signaling.

Research profile — not a clinical treatment claim.

WHY IS IT STUDIED?

- Growth-hormone fragment biology
- Lipid metabolism in experimental systems
- Human evidence and safety remain limited

HOW THE RESEARCH IS INTERPRETED

COMPOUND / MATERIAL — **RESEARCH MODEL** — **EVIDENCE REVIEW**

Mechanism and biological context

A modified fragment of human growth hormone studied for metabolic and adipose-tissue signaling.

Scientific pathways and experimental findings are not proof of clinical benefit.

EVIDENCE LIMITATIONS

Proposed metabolic activity is investigational; it is not established as an effective weight-management therapy.

PRODUCT INFORMATION

- Listed size: 5 mg
- Catalog price: $70.00 CAD
- Category: Weight Management & Metabolic Health

RESEARCH & SAFETY CONSIDERATIONS

Educational and research information only. Not medical advice. No claims of purity, sterility, testing or approval are made without product-specific documentation.
