PRECISION PEPTIDE PARTNERS

DIHEXA

SCIENTIFIC PRODUCT RESEARCH SUMMARY

Cognitive Health

5 mg | $75.00 CAD

WHAT IS IT?

An experimental peptide-derived compound studied in preclinical synaptic plasticity models.

Research profile — not a clinical treatment claim.

WHY IS IT STUDIED?

- HGF/c-Met signaling hypotheses
- Synapse formation models
- Neuronal plasticity

HOW THE RESEARCH IS INTERPRETED

COMPOUND / MATERIAL — **RESEARCH MODEL** — **EVIDENCE REVIEW**

Mechanism and biological context

An experimental peptide-derived compound studied in preclinical synaptic plasticity models.

Scientific pathways and experimental findings are not proof of clinical benefit.

EVIDENCE LIMITATIONS

Human safety and efficacy have not been established.

PRODUCT INFORMATION

- Listed size: 5 mg
- Catalog price: $75.00 CAD
- Category: Cognitive Health

RESEARCH & SAFETY CONSIDERATIONS

Educational and research information only. Not medical advice. No claims of purity, sterility, testing or approval are made without product-specific documentation.
