SCIENTIFIC PRODUCT RESEARCH SUMMARY

Cognitive Health

5 mg | $50.00 CAD

WHAT IS IT?

Delta sleep-inducing peptide is an endogenous-like peptide investigated in sleep-related physiology.

Research profile — not a clinical treatment claim.

WHY IS IT STUDIED?

- Sleep physiology
- Neuropeptide signaling
- Neuroendocrine regulation

HOW THE RESEARCH IS INTERPRETED

COMPOUND / MATERIAL — **RESEARCH MODEL** — **EVIDENCE REVIEW**

Mechanism and biological context

Delta sleep-inducing peptide is an endogenous-like peptide investigated in sleep-related physiology.

Scientific pathways and experimental findings are not proof of clinical benefit.

EVIDENCE LIMITATIONS

Human evidence for therapeutic sleep effects remains insufficient.

PRODUCT INFORMATION

- Listed size: 5 mg
- Catalog price: $50.00 CAD
- Category: Cognitive Health

RESEARCH & SAFETY CONSIDERATIONS

Educational and research information only. Not medical advice. No claims of purity, sterility, testing or approval are made without product-specific documentation.
