PRECISION PEPTIDE PARTNERS

EPITHALON

SCIENTIFIC PRODUCT RESEARCH SUMMARY

Healthy Longevity & Cellular Health

50 mg | $75.00 CAD

WHAT IS IT?

A synthetic tetrapeptide investigated in cellular aging and telomere-related experimental models.

Research profile — not a clinical treatment claim.

WHY IS IT STUDIED?

- Telomere biology hypotheses
- Cellular aging models
- Preclinical longevity research

HOW THE RESEARCH IS INTERPRETED

COMPOUND / MATERIAL — **RESEARCH MODEL** — **EVIDENCE REVIEW**

Mechanism and biological context

A synthetic tetrapeptide investigated in cellular aging and telomere-related experimental models.

Scientific pathways and experimental findings are not proof of clinical benefit.

EVIDENCE LIMITATIONS

Human longevity benefit and long-term safety have not been established.

PRODUCT INFORMATION

- Listed size: 50 mg
- Catalog price: $75.00 CAD
- Category: Healthy Longevity & Cellular Health

RESEARCH & SAFETY CONSIDERATIONS

Educational and research information only. Not medical advice. No claims of purity, sterility, testing or approval are made without product-specific documentation.
