SCIENTIFIC PRODUCT RESEARCH SUMMARY

Healing & Recovery

10 mg | $55.00 CAD

WHAT IS IT?

A tripeptide fragment of alpha-melanocyte-stimulating hormone studied in experimental inflammatory models.

Research profile — not a clinical treatment claim.

WHY IS IT STUDIED?

- Melanocortin-associated signaling
- Experimental inflammatory responses
- Barrier-tissue research

HOW THE RESEARCH IS INTERPRETED

COMPOUND / MATERIAL — **RESEARCH MODEL** — **EVIDENCE REVIEW**

Mechanism and biological context

A tripeptide fragment of alpha-melanocyte-stimulating hormone studied in experimental inflammatory models.

Scientific pathways and experimental findings are not proof of clinical benefit.

EVIDENCE LIMITATIONS

Human clinical safety and effectiveness are not established.

PRODUCT INFORMATION

- Listed size: 10 mg
- Catalog price: $55.00 CAD
- Category: Healing & Recovery

RESEARCH & SAFETY CONSIDERATIONS

Educational and research information only. Not medical advice. No claims of purity, sterility, testing or approval are made without product-specific documentation.
