SCIENTIFIC PRODUCT RESEARCH SUMMARY

Muscle Growth & Performance

5 mg | $70.00 CAD

WHAT IS IT?

A synthetic fragment of growth-hormone-releasing hormone used to study pituitary GH release.

Research profile — not a clinical treatment claim.

WHY IS IT STUDIED?

- GHRH receptor activation
- Pituitary growth-hormone secretion
- Endocrine feedback

HOW THE RESEARCH IS INTERPRETED

COMPOUND / MATERIAL — **RESEARCH MODEL** — **EVIDENCE REVIEW**

Mechanism and biological context

A synthetic fragment of growth-hormone-releasing hormone used to study pituitary GH release.

Scientific pathways and experimental findings are not proof of clinical benefit.

EVIDENCE LIMITATIONS

Clinical relevance depends on the exact formulation and regulatory context.

PRODUCT INFORMATION

- Listed size: 5 mg
- Catalog price: $70.00 CAD
- Category: Muscle Growth & Performance

RESEARCH & SAFETY CONSIDERATIONS

Educational and research information only. Not medical advice. No claims of purity, sterility, testing or approval are made without product-specific documentation.
