SCIENTIFIC PRODUCT RESEARCH SUMMARY

Skin & Hair

10 mg | $45.00 CAD

WHAT IS IT?

An acetylated octapeptide used in cosmetic research related to neuromuscular signaling and expression-line appearance.

Research profile — not a clinical treatment claim.

WHY IS IT STUDIED?

- SNARE-associated signaling hypothesis
- Cosmetic peptide research
- Topical formulation studies

HOW THE RESEARCH IS INTERPRETED

COMPOUND / MATERIAL — **RESEARCH MODEL** — **EVIDENCE REVIEW**

Mechanism and biological context

An acetylated octapeptide used in cosmetic research related to neuromuscular signaling and expression-line appearance.

Scientific pathways and experimental findings are not proof of clinical benefit.

EVIDENCE LIMITATIONS

Cosmetic claims depend on formulation and evidence; injectable use is not established.

PRODUCT INFORMATION

- Listed size: 10 mg
- Catalog price: $45.00 CAD
- Category: Skin & Hair

RESEARCH & SAFETY CONSIDERATIONS

Educational and research information only. Not medical advice. No claims of purity, sterility, testing or approval are made without product-specific documentation.
