PRECISION PEPTIDE PARTNERS

TESAMORELIN

SCIENTIFIC PRODUCT RESEARCH SUMMARY

Muscle Growth & Performance

10 mg | $95.00 CAD

WHAT IS IT?

A synthetic GHRH analogue that acts through growth-hormone-releasing hormone receptors.

Research profile — not a clinical treatment claim.

WHY IS IT STUDIED?

- GHRH receptor signaling
- Growth-hormone and IGF-1 axis
- Body-composition research

HOW THE RESEARCH IS INTERPRETED

COMPOUND / MATERIAL — **RESEARCH MODEL** — **EVIDENCE REVIEW**

Mechanism and biological context

A synthetic GHRH analogue that acts through growth-hormone-releasing hormone receptors.

Scientific pathways and experimental findings are not proof of clinical benefit.

EVIDENCE LIMITATIONS

Specific authorized formulations have defined clinical indications; research vials should not be assumed equivalent.

PRODUCT INFORMATION

- Listed size: 10 mg
- Catalog price: $95.00 CAD
- Category: Muscle Growth & Performance

RESEARCH & SAFETY CONSIDERATIONS

Educational and research information only. Not medical advice. No claims of purity, sterility, testing or approval are made without product-specific documentation.
